Examples of Disclosures for Treatment, Payment and Health Operations:

Example: Information obtained by a nurse, physician, or other member of your health care team will be recorded in your record and used to determine the course of treatment that should work best for you. Your physician will document in your record his or her expectations of the members of your health care team. Members of your health care team will then record the actions they took and their observations. In that way, the physician will know how you are responding to treatment.

Example: A bill may be sent to you or a third-party payer. The information on or accompanying the bill may include information that identifies you, as well as your diagnosis, procedures, and supplies used. We will use your health information for regular health operations.

Example: Members of the medical staff, the risk or quality improvement manager, or members of the quality improvement team may use information in your health record to assess the care and outcomes in your case and others like it. This information will then be used in an effort to continually improve the quality and effectiveness of the healthcare and service we provide.
