For OD students who are interested in both clinical practice and research, a separate application submitted to the graduate program is required. Accelerated entry to PhD program is possible.

Designed to prepare students for careers as vision scientists, researchers, and educators, the student summer research program during the summer provides supervised research training in an area of specialization. A research project, a written thesis, and defense of the thesis is required. Special attention is given to a fundamental background in physiological optics, visual psychophysics, and animal and human psychophysics.

For more information about the UH College of Optometry Graduate Program in Physiological Optics and Vision Science, visit our website at www.opt.uh.edu or email phopgrad@optometry.uh.edu
