Monday, November 27
“Cornea development: New insights from periocular neural crest and embryonic corneal regeneration”
Peter Lwigale, PhD
Associate Professor, Department of Biosciences
Rice University
Host: Vivien Coulson

Tuesday, December 5
“Effects of scleral lens wear on anterior ocular structures”
Muriel M. Schornack, OD, FAAO
Optometrist/Consultant/Assistant Professor
Mayo Clinic
Host: Jason Marsack

Tuesday, January 30
“OCT derived Pigment epithelium central limit – Inner limit of the retina – Minimal Distance (PIMD): A high-resolution morphometric measure for glaucoma follow-up”
Per Söderberg, MD, PhD
Chair, Department of Ophthalmology
Uppsala University
Host: Jan Bergmanson

Monday, February 12
“Imaging and quantifying retinal ganglion cells in human subjects”
Donald Miller, PhD
Professor
School of Optometry
Indiana University
Host: Jason Porter

Monday, March 5
“New advances in amblyopia screening and treatment”
Eileen Birch, PhD, FARVO
Senior Research Scientist
Retina Foundation of the Southwest
Host: Vallabh Das

Monday, April 2
“Neuroprotection and/or neurogenesis? Effect of an alpha7n AChR agonist in the adult mammalian retina”
Cindy Linn, PhD
Professor, Department of Biological Sciences
Western Michigan University
Host: Deborah Otteson
